A Low-Cost, Automated Solution to Control, Track and Manage Inventories and Critical Assets at the Point-of-Use

A Breakthrough technology providing Point-of-Use control solutions to:

- **Track Assets**
- **Control Inventory**
- **Manage Supply Chain Information**

This Lid/Drawer technology is extremely versatile and configurable, allowing users to choose the best level of access control and accountability for each application. Drawers can be set to provide part number control for single-item dispensing and returns or it can provide high-density storage. The choice is yours.

It is available for new shop floor cabinets or you can retrofit existing cabinets – drawer-by-drawer.

Controlled 24x7 Point-of-Use Availability

Ideal for managing consumable materials like:

- Production components
- Critical parts
- Cutting tools
- MRO and safety supplies
- Welding supplies
- Electrical parts

Returnable assets can also be managed:

- Calibrated tools and instruments
- Hand and power tools
- Maintenance spares and parts
- Radios
- Portable computers
- Vehicle keys
- Fixtures and tool holders

Can be adopted in many different environments such as:

- Remote areas
- Line side
- Maintenance areas
- Unattended storerooms
- Parts stores
- Work cells

A Key Component in Overall Supply Chain Initiatives

Lid Vending gives you automated tools to manage and control inventories and assets at the Point-of-Use to support key supply chain initiatives like:

- Lean manufacturing
- Cell-based manufacturing
- Line-side replenishment
- Integrated supply
- Vendor-Managed Inventory (VMI)
- Keep-full programs

Six Different Lid Configurations for Optimal Asset Management

*Opening sizes are for exterior dimensions

2 Lid Configuration
Standard Density
Opening: 275mm x 509.8mm

4 Lid Configuration
Standard Density
Opening: 275mm x 241.3mm

8 Lid Configuration
Standard Density
Opening: 125.98mm x 241.3mm

12 Lid Configuration
Standard Density
Opening: 275mm x 56.1mm

16 Lid Configuration
High Density
Opening: 125.98mm x 102.1mm

24 Lid Configuration
High Density
Opening: 125.98mm x 56.1mm

NOTE: Compartment depth will vary and is dependent on drawer depth.

Universal Touch Screen Control Module

A universal control module that drives the Lid/Drawer Point-of-Use devices. The easy-to-use touch screen interface is a visual gateway to the Vending unit and a world of productivity-enhancing information. Each Control Unit can drive one or many of our Vending products, including Bay, Locker, Scanner and Lid/Drawer.
